Mustang Daily — Vince Bucci

The previous owner of the Diablo Canyon nuclear power plant site is suing Pacific Gas and Electric, present owner of

the site. The suit alleges PG&E reduced the value of surrounding ranch land by mishandling quake studies.

## Diablo land owner suing PG&E again

BY HAROLD ATCHISON

Daily Staff Writer

The man who leased the land to Pacific Gas and Electric for the Diablo Canyon nuclear power plant is now suing the utility for \$100 million.

Robert Marre filed suit in Superior Court yesterday against PG&E, accusing the utility of fraud, negligence, and conspiracy, and asking for \$100 million in punitive damage.

The complaint alleges:

—that PG&E agreed to conduct sufficient earthquake studies before construction started, but in fact only did on-shore studies;

—that PG&E suspected the existence of the Hosgri fault (which runs three miles offshore of the power plant) as far back as 1967, but didn't mention it to any regulatory agency until 1973;

—that PG&E, in covering up its negligence, damaged the value of his ranchland.

In 1966 Marre leased 585 acres of his 8,700-acre ranch to PG&E. In return, PG&E guaranteed bank loans to Marre in an amount—\$8.9 million—equal to the value of the Diablo site plus an 1,800-acre strand on the Marre ranch.

Marre used the money to develop the rest of his ranch, but never repaid PG&E.

PG&E is now in the process of recovering the money. In a foreclosure suit, decided last December and now under appeal, PG&E was awarded the plant site, the coastal strip, and any other ranch land necessary to settle the debt—\$8.9 million plus interest. PG&E was also awarded a 99-year lease on

almost 4,000 acres of the ranch.

James Denow, a San Luis Obispo lawyer representing PG&E in the litigation, said the interest would push the judgement up to 15 or 16 million dollars, but that Marre is now working through bankruptcy court to reduce the amount he owes.

Marre filed a similar suit in March, claiming the skepticism

about nuclear power plants started by the Three Mile Island incident made further development of his land impossible.

PG&E now has 30 days to respond to the latest complaint. If a month passes without response, then Marre can ask for a default judgement.

Marre was not available for comment.

## Plant clinic diagnoses ailments

BY ROSEANN WENTZ

Daily Staff Writer

If your green thumb has turned yellow, don't worry—help is available.

A group of students have volunteered to diagnose plant illnesses, with the assistance of biology professor Mike Yoshimura.

A year ago this quarter, Yoshimura started a plant clinic to help his students in their plant pathology field work.

"I thought it would be a good way for students to get more exposure and become more familiar with diseases in this area," he said.

The samples used for the clinic are donated by students, faculty members, and people in the community. First the donor fills out a form describing the plant's care and previous environment.

The clinic personnel then examine the plant to determine if it is suffering from a disease,

insect, or nutritional problem. The plant is isolated if it is found to have a virus or bacterial disease to avoid contaminating other plants. Information on the plant's status is given to the donor.

"Our major goal is diagnosis," said Laura Southworth, a senior biological sciences major. "We're not licensed to recommend chemicals. Sometimes we direct people to nurseries or to

## Keep the discount

In June, a proposal will come before the San Luis Obispo City Council to eliminate the discount rate given to ASI for city bus tokens. ASI currently purchases the tokens at a discount rate of 28 cents for the 35-cent fare, and then sells them to students for 15 cents.

If the proposal passes, the price of student discount tokens could be increased. This would be a monstrous disservice to students who use the bus system. Students, on and off-campus, make consistent use of the fine system. Some take the bus because they don't have a car, others are merely energy-conscious and are doing their part to conserve by using mass transit.

In this day of rising gas prices and decreasing availability of fossil fuel, it is essential to encourage the use of mass transit. A rise in prices will only serve to hinder students from using the bus system. Thus, the council should make an effort—at all costs—to delay passing of this proposal. Certainly, they should wait until after the June elections to learn of the outcome of Proposition 11, which, if passed, will provide more funding for mass transit in California.

Ironically, it has been decreased gas consumption throughout the state that has caused the move to increase bus fares. The bus company receives revenue from gas taxes and, due to reduced sales, the company's revenue has decreased.

Not only will students be hurt by an increase in fares, but also senior citizens who purchase discount bus tokens. Many are in the same position as students—on a limited income and without alternate forms of transportation.

Looking at the problems of the times—less gas and less money—city council members should do all they can do to further subsidize the system before they raise the prices.

## Letters

Misunderstood

Image

Editors:

It has been called to our attention that there was some misunderstanding concerning proceeds from the Monte Mills dance in January sponsored by Tau Beta Pi. The poster used to advertise the dance stated "proceeds go to Disabled Student Services."

Our intention from the outset was to donate one half of the profits to Disabled Student Services, and this fact was understood by them. In advertising, conciseness is of paramount importance. While striving for conciseness, words are used which at times are misconstrued by a few readers because of the frequent plurality of word meaning in the English language.

We wish to extend our most sincere apologies to anyone who misunderstood our intentions.

Ca Mu Chapter,

Bad Decision

Editors:

The chalkboard in Fisher Science read: "Meet the Candidates" cancelled due to ASI free concert."

Many people were disappointed to miss a prime opportunity to hear the county supervisor's thoughts and opinions.

Whoever made the decision to cancel the forum is perhaps basing the decision on student apathy toward ASI election. Need it be stated that student apathy toward ASI elections does not necessarily mean that the same apathy will be present at county elections?

The decision to cancel reflects the decision makers' opinion of students. If the decision maker is an elected official(s), then they should be trying to expand activity hour, not limit.

Sincerely,  
Katy Globus

Editors:

During the Memorial Day weekend, I was in a local laundromat when a small group of unusually dressed characters entered the premises carrying a movie camera plainly marked "Cal Poly". The members wore kitchen helper type hats bearing boldly written vulgarity.

In moments they seemed to take possession of the premises, and displaying obnoxious behavior. I assume it was a project to film some sort of a "comedy", but the rude and grotesque behavior of these students offended me and several other patrons.

One student proceeded to open a small box of laundry detergent and pour its contents onto the change machine, allowing it to spill onto the counter and the excess to the floor. This action was followed by step two: eating the detergent and spitting it on the table and on the floor, making a terrible mess.

Scene two... the students moved the venting machines and purchased two bags of candies. One girl sat down and two others stood by her side pouring candies over her head, while the girl sat eating her candy, spitting some onto the floor. Meanwhile, still another of the group proceeded to jump on the top of the washing machines and parade.

All the while, this was being filmed with the big black camera marked "Cal Poly".

The group quickly gathered the material and prepared to leave. One concerned lady addressed them and asked if they planned to clean up the mess. The students just laughed and walked out, quickly loading their van and driving away. All this seemed little bizarre and left us stunned as we stood in the filth.

I was personally disgusted and offended by the lack of consideration. These were my peers, my classmates. It is sad to realize that such a small group can jeopardize the reputation of Cal Poly.

Respectfully,  
Crystal L. Carlson

# U bowling prices ow to inflation

BY MARY KIRWAN

Daily Staff Writer

University Union's bowling prices, which have been the same for the past nine years, have finally succumbed to inflation's demands.

In March, bowling prices took a 10 cent hike, from 50 to 60 cents per game.

The union's ten alleys make about \$90 to \$100 a day, according to Bob Jenkins, manager of the union's games. This has not been enough to pay its bills.

Because of increased utility costs, repair charges and the game center has been running close to \$15,000 in deficit this year. This deficit has been absorbed by income-earning parts of the Union.

Gersten director of ASI business affairs, said they refrained from raising bowling prices as long as possible "but this year we couldn't carry it without a deficit."

Gersten said it was debated whether to raise bowling prices five cents or 10 cents per game. They settled for the higher mark up to prevent future price increases.

Jenkins said bowling is an expensive operation to run. A commercial bowling alley costs from 75 cents to 80 cents per game to operate and most charge the consumer \$1 to \$1.25 per game. The major costs of bowling are electricity and utilities.

In the nine years the union's bowling alley has been in operation, "everything has gone up in price," Jenkins said.

During those nine years, the cost of annual alley reconditioning has soared from \$1,200 to \$2,000, wages have increased from \$2.60 an hour to \$3.38, and score sheets and pencils have gone up more than 100 percent, he said.

Gersten said utilities, the game center's main expense, experienced the biggest increase. He said nine years ago the entire union had a utility bill of \$25,000.

This year the game center alone expects a utility bill of \$90,000 to \$100,000. This is part of the \$90,000 to \$100,000 utility bill the entire union will pay.

Gersten said PG&E has increased its costs from 17 percent to 20 percent, but the union has not received notice if or when the increase will affect them.

Despite the bowling price hike, business has not slowed down, Jenkins said. Cal Poly is still at least 40 cents cheaper than commercial alleys, he said, and it is also one of the cheaper student union alleys.

When the University Union bowling alley opened, its 50-cent game price was the highest in the state. Jenkins said it had the highest price to avoid continuous price increases. He said Fresno State was charging 45 cents per game nine years ago, and has since repeatedly raised its price, which now rest at 65 cents.

Jenkins said bowling is popular at Cal Poly, adding that it is the most popular participation sport world-

Mustang Daily — Dan Sternau

Bruce Finch hooks his ball down one of the University Union bowling alley's ten lanes. The price per game at the UU jumped from 50 to 60 cents in March because of rising utility costs.

## Bio lab conversion hits financial snag

BY JIM WITTY

Daily Staff Writer

The conversion of biology laboratories into chemistry labs has run into a financial snag.

Supervising Equipment Technician John Swanson said the lowest bid of \$654,777 for the conversion was 44 percent higher than the \$452,000 allotted for the project.

According to Executive Dean Doug Gerard, the project, known as Convert Science 3, was underfunded by the state.

"The initial budget was arbitrarily too low," said Gerard.

Gerard presented three alternative solutions to the dilemma:

—Make cuts in the project.

—Appeal to the state for additional funds.

—Abandon the project completely.

Gerard noted the project architect is presently trying to find ways to cut the cost but added, "The project is minimal as it is."

According to Gerard, the best chance will probably be an appeal to the state combined with a scaled-down plan.

"We might try to convince Sacramento for more

money," said Gerard. "We're always pretty fair with them."

The conversion project consists of six vacant laboratory rooms in the Science Building, installation of lab furniture, fume hoods, and some structural modification, said Gerard.

Swanson said the rooms were vacated by the biology department when it moved to Science North.

Swanson cited the constant need for good teaching facilities and the crowded situation as reasons for the conversion.

"We're very crowded

and we'd like to have a better environment."

Swanson didn't know when and if the conversion will start. Said Swanson, "We're frustrated and we'll do the best we can."

## Summer bulletin available

The summer bulletin for Cal Poly Extended Education Programs is now available to those wishing to participate in courses offered this summer. Late spring quarter courses are also listed.

By Manuel Luz

Extended Education annually sponsors a fee-supported Summer Sessions program which offers residence credit to those who enroll.

There is a six-week session from June 23 to August 2 and a three-week session from June 23 through July 12. The various workshops are from June 18 to August 27.

Summer Session fees are \$29 per lecture unit, \$38 per activity unit and \$58 per laboratory unit.

Thirty Cal Poly Extension courses are scheduled between June 18 and August 27, including courses in real estate, architecture, computer science, education, engineering, physical education and psychology.

These sessions should not be confused with Cal Poly's summer quarter, a full ten-week program for matriculated students and offered as part of the regular curriculum.

Summer quarter courses will also be available to extension students through concurrent enrollment. Those wanting to learn a subject or take a course for fun can do so if there is room in the class and with permission of the instructor.

Fees for Cal Poly Extension courses are \$27 per lecture unit, \$35 per activity unit and \$54 per laboratory unit.

Further information about any of the Extended Education Programs can be obtained by writing "Extension, Cal Poly, San Luis Obispo, CA 93407," or by telephoning 546-2053.

### Sailing club

The Sailing Club will have a sailing clinic Saturday on Lopez lake. Price is \$1.50 and all are invited to attend. The clinic begins at 11 a.m.

### Alcohol educator

A position is now open for a peer alcohol educator for Student Health Services. The Health Education Program is now accepting applications for 1980-81. For more information and applications, call Jeanette Reese at 546-1211.

## Poly group, Sierra Club in land use fight

BY JENNY COYLE

Daily Staff Writer

The Sierra Club and Cal Poly Penguins locked horns about an annual motorcycle race held earlier this month, and are honing arguments for the off-road event next year.

Sierra Club conservation Chairman Robert Griffin said the Santa Lucia Chapter intends to prevent the Penguin's 31st Annual Hi-Mountain Enduro in 1981.

The chapter opposes the race because motorcycle riding in this particular area of the Los Padres National Forest conflicts

with all other legitimate uses of the forest, said Griffin.

The environmentalists plan to work closely with government agencies involved in the event. Griffin said the club is even willing to take the Penguins to court. He expects to be back in the pit with the Penguins in December.

"We want to work with all the government agencies that have jurisdiction over this event just to make sure there are no oversights or misunderstandings in the application for a land use

permit," Griffin said.

He said the Sierra Club also has congressional representatives working to have parts of the enduro course declared "wilderness areas"—restricted from off-road vehicle use.

If the motorcycle club fails to handle the proceedings lawfully, he said, "We'll spend a few thousand dollars and take the Penguins to court."

The Sierra Club appealed the permit for the race this year at three levels, and failed three times to overturn the decision. The event went on as planned Sunday, May 11, drawing 320 participants.

The Penguins have also begun early preparation in hopes that the legal proceedings they expect will be completed by March.

Enduro steward Paul Peterson, who organized the race, said the Penguins will concentrate on perfecting the permit application to minimize Sierra Club criticism.

The application requests use of Los Padres National Forest. It includes approval from county sheriff, sanitation, and engineering departments and permission from private landowners with property included in the course. A liability insurance policy must also be included.

Peterson said if the Penguins face a court trial their lawyers will be supplied by the American Motorcycle Association, District 37.

He said the bikes are equipped with forestry approved spark arresters to prevent forest fires, and must meet noise reduction requirements.

Mustang Daily — Susan H. H.

Dirt bikes like this are the subject of a brewing feud between the Santa Lucia chapter of the Sierra Club and the Cal Poly Penguin off-road club.

"We don't blaze any new trails," said Peterson. "It's not like we're running over any green, grassy open meadows."

Furthermore, said Peterson, the trails follow county roads, established motorcycle paths and fire roads.

The Penguins will fight for their right to use those trails, said Peterson.

"We don't feel the Enduro race harms the

environment," he said.

Griffin disagrees.

"Anyone who would argue that 500 motorcycles streaming through a forest is compatible with the flora and fauna is irresponsible," said the Sierra Club representative.

Griffin said the Environmental Analysis Report, assessing the impact of such a race on the environment, was "grossly inadequate."

"It overlooked so very hazardous impacts the area such as erosion."

Griffin also said the forest used for the EAR this year was a short form; Sierra Club will demand a longer form for the 1981 Enduro.

"Convince me that Mother Nature intends for motorcycles to be riding around out there," said Griffin, "and maybe I'll reconsider my stand."

## Oil Lease 53 talk, Morro Bay saltmarsh walk and Valencia Peak hike from ECOSLO

Offshore oil drilling hearings and early morning bird watches are two of many activities planned by the Environmental Center of San Luis Obispo County during the month of June.

An informational meeting on the possibility of offshore oil drilling near Morro Bay will be held Saturday, May 31, at the San Luis Obispo County Board of Supervisors Chambers at 9 a.m.

Outdoor ventures on the same day are a climb up Valencia Peak, scheduled to begin at Montana De Oro State Park at 9:30 a.m., and a walk, through the saltmarsh, leaving from the Natural History Museum in Morro Bay State Park at 8:30 a.m.

The Central California Coastal Coalition will hold its weekly meeting on Monday, June 2 at ECOSLO, 985 Palm St. at 7 p.m. The aim of the group is to stop offshore oil

drilling along the central coast.

The birds of Montana De Oro will be the subject of a nature watch on Tuesday, June 3 at 8 a.m. beginning at the park headquarters.

A bird watch of Coon Creek will begin at the southern parking lot at Montana De Oro at 8 a.m. on Thursday, June 5.

An ECOSLO pot luck picnic at Laguna Lake Park—including live music, games and guest speakers—will begin at 10 a.m. on Friday, June 7.

A tour of solar homes in

Arroyo Grande, Pisano Beach and Grover Beach starts at Elm Park at 8 a.m. on Saturday, June 8 at noon.

The tour includes homes and Amsoil, manufacturer of solar collectors. Tickets are \$5 in advance and \$3 the day of the tour, and are available at ECOSLO.

A hike into East Zard Canyon will begin at 8 a.m. on Saturday, June 8. A car pool will be formed at the corner of Peach Valley Road and Woodland Drive in Los Osos.

# A backstage peek at Cinderella

Photos by Vern Ahrendes

Hours of preparation go into any stage production. The make-up call is two hours before curtain time.

Bradly Bessey, who had to look like a man in his forties, applies his facial toning and highlight make-up (upper left).

Steven Zurich had to get a hair cut before the Thursday performance because his hair was too long for the time period, and Mary Graves was the one elected to do the royal trim (above).

Tiffany Workman had the longest make-up job. She played the role of the fairy godmother and she had to look like a woman in her eighties. Gray tinting had to be applied to her hair, and Vicki Bailen had to apply the undercoating powder to the wrinkle tissue that was applied to Tiffany's face (lower left).

Kristin Jakobsen was backstage specifically to help set the women's hair. She is shown (below) drawing back the hair of Kelly Zirbes in preparation for flowers that were placed in her hair.

Zirbes is busy making a crooked nose—a job that took over an hour.

# omance of the railroad fosters unusual 'sport'

BY VICKI MILLER

Daily Staff Writer

*I could feel my arm being crushed against the sooty, concrete wall. My head was pressed into someone's chest, but it was too dark to tell whose. The pain in my arm subsided as someone jabbed his elbow into my ribs.*

*"Sorry," mumbled a voice from the darkness.*

*I was trapped by the contortion of arms and legs pinning me into the tiny niche. But even through the discomfort, I could feel the synchronization of everyone's breathing in anticipation of the train that would be barreling through the black, dingy tunnel at any time...*

Jeff Sorenson has always liked trains. But his hobby has far passed the stage when he just took pictures of them. Now he watches them closely—from inside a train tunnel.

"You get up to the track and can smell all the oil and your heart beats a little faster," said the Cal Poly third year architectural engineering student.

Sorenson said he enjoys doing things people don't usually do and train tunneling falls into this category.

He said the excitement starts when he and his friends get on their old "train tunnel" clothes late at night. They wait for a train whistle to blow and then figure out which direction the train is going.

If it is headed north, they run to their car and drive up Cuest Grade to the train tunnel.

Inside the tunnel there are holes cut in the walls which hold about five people, said Sorenson.

"You find your niche, but stand around outside the niche until you hear the tracks start clicking," said Sorenson. "Then you hear the low rumble."

As the rumble gets louder, the light from the train hits the walls and the most exciting part begins, he said.

"Finally the light hits you and you can see how 'humungo' that train is."

The train passes so close you could reach out and touch it if you wanted to, but it's still far enough away to be safe, said Sorenson.

"There's enough room on the sides that you could lie down, probably without being sucked in," he said.

"The worst thing is the taste after I get out of there. I get a sooty, diesel taste in my mouth," he said.

Sorenson said he hasn't gone in over six weeks and gets the urge to "tunnel" whenever he hears a train whistle.

"I miss it," he said. "I'm going through withdrawals."

*...The wind that had been blowing into the tunnel from outside halted eerily. There was no movement as the concrete walls began to resound with the thunder*

*of the approaching engine.*

Suddenly a flashing light burst around the curve of the tunnel. It illuminated our five fear-stricken faces for a brief moment as the engine plowed closer toward our secret vantage point.

The heartbeat of the train engine echoed through the tunnel with almost unbearable force as the engine crushed past our tiny, overflowing niche. The engine continued down the other side of the grade, applying its brakes to combat the increasing speed of the succeeding cars and emitted a high, grating squeal.

The feeble light of our flashlight revealed the multitude of cars speeding by, straining to reach into the safety of our hideout.

A sudden explosion of light, sound and wind filled the tunnel as I closed my eyes and dug my face deeper into someone's chest.

Hot, thick, black smoke from the five engines that helped push the massive train over the steep grade filled my nose and lungs. I held my breath, waiting for a burst of cool air to clear the sickly sweet soot from my throat.

When the earthquake-like vibration of the pushers had subsided, I knew half of the train had finished cutting its way through the black tunnel.

The unearthly squeal of the brakes, the echoing of the cars on the tracks, and the still slightly warm, dancing air tinged with soot continued for what seemed an eternity.

As the caboose finally sailed through the spotlight of our tiny flashlight, the earthshaking rumble started to fade.

The night was once again a quiet mixture of crickets and soft breathing, broken only once by the sound of a faint train whistle somewhere on its way down the grade...

"I get a thrill out of it," said Kevin Meikle, another avid train tumbler. "I always liked big trains."

But the third year architecture student said tunneling can be dangerous.

"It's time to be serious when you hear the train," said Meikle. "Don't push your buddy out into the tracks when the train is coming."

Meikle said going with someone who has gone before makes train tunneling safer.

"The only drawback I see with train tunneling is having to hold your breath and stick your nose in your T-shirt as the train goes by," said Meikle.

He said there are new trespassing signs posted by the tunnel, and that train tunneling is probably illegal.

According to the Southern Pacific Transportation Company, train tunneling is illegal. It is a misdemeanor and carries a maximum sentence of one year in jail or a \$500 fine.

## Scientists tell of potential for more violent eruptions

ANCOUVER, Wash.

A pair of earthquakes shook the area around Mount St. Helens Wednesday and other scientists warned that a tremendous eruption could come from the volcano at any time.

The volcano, which erupted March 18 with a blast that left incalculable devastation, continued to erupt, spewing a plume of steam and ash 3 miles

into the sky. The death toll at 21 people listed as missing, a dozen

helicopters searched under rising skies for possible survivors. But authorities there is little chance of finding any more people and the air search probably will be called off by the weekend.

Rescuers brought out survivors in the first days following the eruption, but since then they found only dead bodies and a German

shepherd with her pups.

Two moderate earthquakes shook Mount Margaret, about eight miles north-northwest of the volcano, on Wednesday, but scientists did not know what connection they had with Mount St. Helens.

The Mount Margaret quakes, measuring 4.0 and 3.8 on the Richter scale, were felt as far away as Kelso and Longview, 40 miles to the west. They also rattled the Cowlitz County jail in Longview.

The quakes were the first significant seismic activity near Mount St. Helens since a 90-minute harmonic tremor throbbed through the mountain Tuesday afternoon. Harmonic tremors are rhythmic ground movements which geologists have linked to steam and ash emissions and which may signal the movement of magma within or below the mountain.

Scientists have had little luck forecasting what the mountain would do since it first started acting up three months ago. However, Dwight Crandall, chief of hazards evaluation for the U.S. Geological Survey, outlined a new scenario of potential hazards.

"As long as we are getting any gas-rich magma coming out of the volcano, there is a chance of a large eruption anytime," he said.

Magma is molten rock. Crandall said lateral eruptive blasts, like the one on May 18, could cause damage extending about 12 miles north of the mountain.

cultural Extension. are farm advisors can recommend treatments."

Students volunteer for project for many reasons, said Carla Mussen, student

man for the group. said it gives them personal experience for their goals and ground in laboratory

studies. The social ramifications are another reason they volunteer," added Laura

Worth laughingly. Most of the workers are about five hours a week to the study of plants. This quarter there

are seven or eight active participants, said Steve Bowe, another clinic volunteer.

"More samples would be very helpful," said Bowe. "We have a definite public relations problem."

Gary Sherlund agreed. "The more things we get, the more we are exposed to and learn," he said.

People wishing to donate plants with problems should bring a sizable piece to Fisher Hall 393, the location of the plant clinic. If no one is there, samples can be left at the biological sciences department office, Fisher Hall 273.

A construction worker from the new library takes a snooze during a recent crew break.

## Iran threatens to try hostages

From The Associated Press

Iranian militants warned Wednesday that the 53 American hostages will be "killed and punished" if the deposed Shah is not released with his riches to Egypt. Their latest threat coincided with the opening session of the new Iranian Parliament which will decide the fate of the hostages.

The Parliament heard a revolutionary proposal from Ayatollah Ruhollah Khomeini, recommending "a policy of neither East nor West" and Iranian President Abolhassan Bani-Sadr warned of "economic hardships." But Khomeini nor Bani-Sadr mentioned the hostages, who spent their 100th day in captivity and Iranian Chancellor Bruno Kreisky said in Athens, "he thought there was only 'a fair chance' the hostages will be released sooner or later."

A statement broadcast Wednesday over Tehran radio, the militants urged the government to ignore pleas for the "great satan,"

the United States.

The militants, who seized the hostages after taking over the U.S. Embassy in Tehran last Nov. 4, said the Iranian people supported their demand for the return of the shah as a condition for the hostages' release and said "any other decision" by Parliament would require approval by the nation.

Many prominent members of the Islamic Republican Party support the militants' demands for the return of the shah and his money and also sympathize with the demand that some of the captives be tried as spies. But on Wednesday, during its first formal session, the lawmakers chose Yadollah Sahabi, a top adviser to former Prime Minister Mehdi Bazargan, a moderate, as their provisional chairman, and selected Bazargan as his deputy. Bazargan's selection was made over the shouts of Ayatollah Sadegh Khalkhali, a judge who has sentenced dozens of Iranians to death.

## Indictment in Abscam probe

WASHINGTON (AP) — Raymond F. Lederer, 44, was indicted Wednesday on bribery charges, the second congressman to be charged in the Abscam political corruption probe. The indictment, handed down by a federal grand jury in Brooklyn, New York, named three other men for aiding and abetting bribery.

Also named in the indictment were Angelo J. Delichetti, mayor of Camden, N.J., and a New Jersey state senator; Philadelphia councilman C. Johanson, and Edward L. Criden, a Philadelphia attorney. Attorney General

Benjamin R. Civiletti said in a written statement that all four defendants were charged with bribery, conspiracy and with interstate travel to aid racketeering. Lederer also was charged with receipt of an unlawful gratuity.

Errichetti, Johanson and Criden previously have been indicted on charges resulting from the Abscam investigation, in which FBI agents posed as representatives of a wealthy Arab businessman willing to pay money for political favors.

On Tuesday, Rep. Michael O. Myers, D-Pa., became the first member of Congress to be indicted in the Abscam investigation.

## Report: Jordan's nose is clean

NEW YORK (AP) — The federal prosecutor investigated allegations that Hamilton used cocaine said in a report Wednesday he found insufficient evidence to bring a warrant charging Hamilton with cocaine charges against the White House chief of

due deliberation, the grand jury reported that there was insufficient evidence for an indictment of Hamilton Jordan and voted a no true bill. Christy's report said that during the investigation his staff conducted about 100 interviews with about 65 persons.

The report said there were several people who refused to be interviewed by the FBI without being granted immunity from prosecution "or simply had refused to be interviewed at all."

Christy made no statement on the report, which was released here.

# Newsline

## Military to rule in South Korea

SEOUL, South Korea (AP) — The military, unchallenged after crushing democracy-seeking insurgents, will formalize its control of South Korea by establishing a council that will govern by martial law decree, informed sources said Wednesday.

The sources said Choi Kyuhah, the interim civilian president, will remain in his post, but Chun Doo-hwan, the nation's security commander, and other generals will run the country.

The popularly elected national legislature will have virtually no role to

play in the decision-making process once council members are named, the sources said.

The military offered a limited amnesty in Kwangju on Wednesday, a day after paratroopers killed 17 civilians when they crushed a nine-day rebellion. The rebellion, in which 290 persons were killed, was led by students demanding greater democracy.

In Washington, a coalition of human rights groups accused President Carter of supporting the "most vicious and fanatic elements" of the South Korean military.

## Hurricanes to be male again

WASHINGTON (AP) — Men's names will make their second appearance among hurricane titles this season, with Allen selected as the name of the first tropical storm.

The National Oceanic and Atmospheric Administration issued this year's list of Atlantic and Caribbean storm names on Wednesday. Allen will be followed by Bonnie,

Charley, Danielle, Earl, Frances, Georges, Hermine, Ivan, Jeanne, Karl, Lisa, Mitch, Nicole, Otto, Paula, Richard, Shary, Thomas, Virginia and Walter.

The hurricane season begins June 1. The storms are given names to reduce confusion when two or more are being tracked at the same time, officials said.

## Unemployment hits 7 percent

WASHINGTON (AP) — Americans filed more claims for unemployment insurance during mid-May than in any week since at least 1967, an ominous sign of a new surge in the nation's jobless rate, the government reported Wednesday.

The Labor Department said a seasonally adjusted record of 675,000 Americans filed new claims for jobless benefits in the

week ending May 17, a sharp jump from the previous high of 616,000 first-time claims recorded the week before.

Unemployment shot up from 6.2 percent in March to a 7 percent rate in April, the largest one-month jump since the depths of the last recession. Each rise of one percentage point in the unemployment rate means 1,040,000 more Americans are out of work.

## Between the lines

# Sports commentator's styles blasted

BY TOM JOHNSON

Daily Sports Editor

Many people assume sports writers and editors are frustrated jocks—the small kid on the block who, no matter how many balls he hit in the vacant lot behind his home, could not play first string for his Little League

team. That may be true of many sports editors, but it was not true of me. I was a frustrated sports analyst.

Through the years I have stashed away scores of observations and criticisms in the deeper recesses of my mind. The information has lain dormant for 10 or so years, but recently has clamored to get out. So I decided to devote the column this week to discussing the observations and criticisms I have made of sports analysts and other sports personages through the years.

### Boxing

—Why is it when a boxer is staggering about the ring after a monumental blow, and about to collapse, does the announcer say, "He is looking a bit groggy now?"

### Golf

—Why is it when Jack Nicklaus lofts a ball 20 feet from the cup does Ken Venturi call it an absolutely perfect shot? If it was absolutely perfect it would have landed in the cup.

### Baseball

—Why does Tony Kubek spend more time making bald jokes than commenting on the game?

—Why does Joe Garagiola spend more time defending his baldness, telling Yogi Berra stories and discussing

steel production in Yugoslavia than commenting on game?

### Basketball

—Why do they have the moronic slam-dunk competitions which prejudice against the little men like Calvin Murphy and Nate Archibald? The contest merely perpetuates the myth that basketball is reserved for those with pituitary problems.

—Why doesn't someone throttle Bill King the next time he says "HOLY TOLEDO!!"?

### Football

—Why Howard Cosell?

—Why do the cameramen spend more time ogling the bouncy Dallas Cowboy Cheerleaders than watching the game?

—Why, when the cameramen pan the sidelines after a touchdown, does a player invariably wave at the camera and say, "Hi Mom!"? Why can't they say "Hi Dad!" "Hi Uncle Jim back in Scranton, Pennsylvania," "Hi Eat Joe's" or anything but that blasted "Hi Mom!"?

My ego has been satisfied. My soul has been completely purged so I'll let you get back to the game.

Hi Mom!

## Weeney team smokes

BY VERN AHRENDES

Daily Staff Writer

Tom Krzmarzick pumped in 22 points to lead the Burnt Weeney to the intramural basketball "B" League championship.

Red hot shooting in the first half enabled the Burnt Weeney to coast to a 60-44 win over the Misfits.

Crisp passing and domination of the offensive boards paced the Burnt Weeney to a 28-15 halftime edge. Tom and Sam Edmonds each tossed in eight first-half points.

Edmonds controlled the middle of the Weeney 2-1-2 defense and led the team in

rebounding.

With five minutes left in the first half, the Burnt Weeney reeled off 10 unanswered points to take a 24-8 lead. Tom and Dave Krzmarzick both pumped in a pair of 20 footers and Edmonds muscled in an offensive tip to account for the 10 point run.

Tom racked up 14 second-half points and Joe Grove added seven points to put the game out of reach.

Edmonds finished the game with 12 points and Dave Krzmarzick added 10.

Mike Thompson led the Misfits with 10 points.

The Burnt Weeney earned the championship berth by downing Smegma and the Misfits outlasted Callen Bo.

In the "A" League finals, Dads II upended the Fog, 45-37.

Rich Alvari scored 13 points, nine in the first half

See Weed, page 11

## New cagers conduct draft

LOS ANGELES (AP) — Austin Carr of Cleveland and Richard Washington of Milwaukee were among the 22 players selected today by the Dallas Mavericks in the National Basketball Association expansion draft.

The Mavericks, who will begin play next season, picked one player from each of the 22 existing NBA teams, who were allowed to protect eight men on their roster.

For the most part, the Mavericks bypassed the better known players who were available, choosing instead to go with younger, less experienced players who may develop into front-line pros.

Besides Carr and

Washington, other players chosen by the Mavericks included: Jack Givens, Atlanta; Jeff Judkins, Boston; Delmer Beshore, Chicago; Terry Duerod, Denver; Ray Townsend, Detroit; Golden State; Alonzo Bradley, Houston; Joe Hassett, Indiana; Billy McKinney, Kansas City.

Identified Mustang player fires a goal past Berkeley's Livingston.

## Poloists outclassed

KAREN LUDLOW

Daily Staff Writer

California has had a reputation as a producer of some of the nation's best polo players. Many of the top players were in the last weekend for the 1980 Senior Cup Championships.

Newport, led by Brian Gary Figuero, won the three day tournament over City of Industry 6-5 in sudden death game with a penalty. Newport was the winner of the Olympic and AAU Nationals last year.

Poly and Cuesta did as well as the polo powerhouses. Most to Cypress in the

first game on Saturday 13-8, then fell to Long Beach 13-1. Sunday wasn't much better for the Mustangs. Newport defeated Poly 17-3, and the Mustangs fell out of tournament play when Stanford won 10-4 in a close game. The score at the half in the game against Stanford was 3-2.

Cuesta coach Terry Bowen said the scores were not indicative of the Mustang's talent as the class of athletes at the Senior Cup Tournament was out of Cal Poly's league.

"Cal Poly has the athletes to be strong in water polo," said Cuesta coach, Terry Bowen. "They (Poly) just have to get a more stable program." Bowen was the tour-

nament director and host to the 20 teams entered.

Cal Poly showed inconsistency, not in their play but in their turnout. Assistant Coach Paul Cutino had to play many of the games and in the Stanford contest the team was still a man short.

The low player turnout might be accounted for by the fact that Cal Poly wasn't sure if they would have a program next season and many of the players sat out spring practice session for that reason.

Steve Farrell was the leading scorer for the Mustangs, hitting six shots in the four games. Brad Stahl added four, Joe Grafton hit three, and Art Tackett added two more.
